

On Par Scoring Worksheet

Instructions

1. One person volunteers to start Game 1 by throwing the dice.
2. Observe the rolled number and enter it in the 'Roll' column for Round 1.
3. Calculate the difference between the desired number (Par) and this rolled number and record this in the 'Score' column.
4. There are no negative numbers, only a whole number representing the difference between these two digits.
5. Taking turns, progress to the left around the circle with each person rolling the dice for each consecutive Rounds 2 to 6.
6. For Rounds 7 to 12, the next two players will roll the dice (one at a time) and add the sum of their two rolls to the Roll column and then subtract the Par to calculate the Score for that round.
7. The next two people roll the dice for Round 8, repeating the process described above.
8. When all 12 Rounds have been rolled, tally the numbers recorded in the Score column.
9. The team with the lowest total Score wins.

Round / Par	Players	Game 1		Game 2		Game 3	
		Roll	Score	Roll	Score	Roll	Score
1	1						
2	1						
3	1						
4	1						
5	1						
6	1						
7	2						
8	2						
9	2						
10	2						
11	2						
12	2
